Archer Mechanical

& Maintenance Contractors Inc.

Mechanical systems are at the heart of buildings. They make buildings more marketable, comfortable and more profitable.

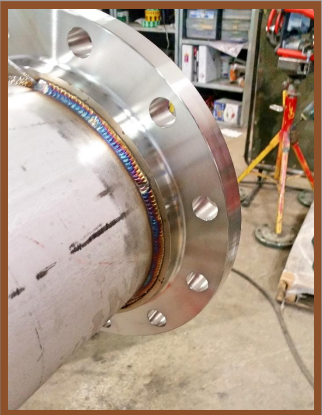

Specializing in sustainable mechanical and plumbing systems, we provide services in design-build, design-assist, new construction, additions, remodels, retrofits, service and preventative maintenance. Our knowledgeable TEAM consists of experienced Executives, Project Managers, Project Engineers, Safety Director, Superintendents, Foreman, Estimators,

Detailers, 3D Coordinators and a Purchasing work force all centrally located in the Salt Lake Valley.

Decreasing Cost and increasing value through innovative design, manufacturing and in house fabrication.

With our **“Build it before we build it”** motto, we alleviate the need for field modifications using our state of the art fabrication facility.

Plan / Spec

We examine all plans and specifications working closely with the general contractor, architect and engineer teams to provide cost effective solutions to your construction projects.

Working collectively as a group, aiding in the coordination of systems, and completion of the design, we analyze the Mechanical systems and methods comparing both cost and performance.

Design Assist

Design Build

A strong partnership between; owners, architects, general contractors, and engineers can streamline budgets and schedules. Providing single-source accountability with minimal change orders, ultimately delivering a high-value product for the owner.

Designing a project to the predetermined budget requirements, rather than establishing costs after the design is completed. With the Target Value Design method you can be certain that your “expected costs” do not exceed your “budgeted costs”.

Target Value Design

GMP Development

When an expedited schedule, early product procurement and fast track project delivery are the critical factors to the success of your project, a GMP format may be in your best interests.
